

MOSFET AS A SWITCH TRAINER

MODEL AMP46A

This trainer has been designed with a view to provide practical & experimental knowledge of MOSFET as a switch.

SPECIFICATIONS

- | | | |
|--------------------------|---|--|
| 1. Built-in Power supply | : | +5V at 200mA IC Regulated & short circuit protected |
| 2. Power requirement | : | 230V, 50Hz AC. |
| 3. MOSFET - 1 No. | | |
| 4. Different Resistors | | |
| 5. Standard Accessories | : | 1. A manual having Practical.
2. Connecting patch cords |

EXPERIMENTS

1. To study of Transistor as a switch.

In keeping view of SIGMA policy of continuous development and improvement, the Specifications may be changed without prior notice or obligation.
