

# WIRELESS KEYBOARD TRAINER

MODEL - WKB100

This trainer has been designed with a view to provide practical and experimental knowledge of Wireless Keyboard on a SINGLE P.C.B

## FEATURES

1. Study of Wireless Keyboard circuit used for Computer.
2. Tracing of the circuit and identification of different components.
3. Measurement of test point voltages.
4. Observation of test point Waveforms.
5. A detailed manual containing different practical is provided along with the board.

## SPECIFICATIONS

- |                         |   |                                                    |
|-------------------------|---|----------------------------------------------------|
| 1. Keys                 | : | 104 Keys TVSE Gold                                 |
| 2. Key Type             | : | Spring Force type.                                 |
| 3. Signals              | : | Clock, Data                                        |
| 4. Operating Range      | : | 33 Feet (10m) operating distance                   |
| 5. Input cables         | : | PS/2 or USB                                        |
| 6. Standard Accessories | : | 1. Trainer P.C.B.<br>2. A Manual having practical. |

In keeping view of SIGMA policy of continuous development and improvement, the Specifications may be changed without prior notice or obligation.
